Lower Allen Township's

Guide to MS4

Municipal Separate Storm Sewer System

November 2026 Edition

Leaf Collection Continues

Lower Allen Township will continue leaf pick up curbside by the Public Works Department. The Public Works Department is equipped with leaf picking machines that can reach the narrowest of streets in the Township. Only leaves should be placed curbside for pick up. Leaves should be raked to piles that extend into the roadway not more than 3 feet.

Track the Truck

Lower Allen Township residents can track the leaf collection truck throughout the week at www.latwp.org. The online map shows completed roads and areas serviced. Please remember that this is a guide, and our Public Works crew is working diligently to reach all Township neighborhoods throughout the leaf collection season. If your property has not yet been serviced, please be patient. We will be there soon!

Where do the leaves go?

Leaves collected through the Township's curbside collection program are transported to the Public Works Compost Facility, where they are windrowed and turned throughout the winter and spring. The finished compost is made available to residents for pickup in the spring and provides a beneficial soil amendment for gardens and flowerbeds.
