## **Where to Dispose of Lightbulbs?**

Lightbulbs can be various shapes and sizes. Lightbulbs from household residences (from lamps and room lights) can be disposed of in curbside trash collection carts. They are not recyclable in curbside carts. Lightbulbs that are considered Compact Fluorescent Lightbulbs (CFL's) and tube lights should be disposed of at Household Hazardous Waste events and at the Cumberland Electronics Recycling Center. Tube lighting is sometimes found in garage lights and office lights and should not be disposed of in curbside collection or commercial dumpsters. For questions regarding disposal of lightbulbs, visit the Cumberland County Recycling and Waste webpage or contact Lower Allen Township's Environmental Programs Manager.
